

Semantic CMS UX Competition

Don't just dream about building the next semantic killer application.

“Do it!”

€80k Awards

Invitation to Competition Launch

IKS Paris Workshop
5-6 July 2011

Featuring special guest
Janus Boye as the Contest Moderator

Janus will explain the details of the contest and will monitor the whole process. If you plan to participate but are still looking for partners, Paris Workshop is the right place to be.

Proposal Criteria

1. **Semantically Enriched User-centric Story.** The proposed solution should focus on providing a compelling semantic experience. Start with the existing IKS user stories or bring your own ideas.
2. **Bring new levels of Semanticity to CMS platforms.** The proposed solution should be able to leverage any kind of existing CMS/KMS/ECM system and should ideally be implemented in minutes rather than weeks.
3. **Free and Open Source Deliverable.** The awards will let the winners finance the development and implementation of the work. In exchange we require the deliverables to be released under a permissive open source license.
4. **Leverage the existing IKS Semantic Stack.** The proposed solution should best leverage the existing IKS technology stack and reuse as many components as possible.

Awards

The **Two winners** will receive **40,000 Euro each** to realise their proposals. Funding is based on the successful execution of the implementation plan. This competition is organised and governed as part of the IKS Early Adopters Programme.

Submission Process

1. Get the details, refine your proposal, and find partners at IKS Paris Workshop.
2. Work on your proposal including your implementation plan.
3. Submit online before November 2011 (exact date will follow Paris Workshop).
4. A total of 5 will be shortlisted, and invited to pitch proposals at the J.Boye Conference in November 2011.
5. Final decision on the two winners, based on a combination of expert jury and audience feedback at the J.Boye Conference.
